

Name	Image	Job/Function - what the organ does for the body	ALL the systems of the body that use this organ (hint more than 1)
1 Large Intestine		To absorb water from the leftover food	Excretory Digestive Muscular Nervous
2 Pancreas		Control the amount of glucose, or sugar, in the blood.	Circulatory Nervous Digestive
3 Brain		In charge of all the functions your body needs to stay alive. Controls involuntary muscles.	Nervous Circulatory Digestive Respiratory Immune (ALL systems)
4 Right Lung		Filter air and pull in oxygen to your blood and release carbon dioxide and water from your blood.	Respiratory Circulatory Muscular Nervous
5 Liver		Breaks down medicines and other substances, and it helps eliminate from the body Produces Bile	Digestive Excretory Nervous
6 Bronchiole		Exchange of oxygen, carbon dioxide and water takes place with the blood	Respiratory Circulatory Nervous

<p>7 Mouth</p>		<p>Beginning of digestions, tears, rips and grinds food.</p>	<p>Digestive Respiratory Nervous Muscular (tounge)</p>
<p>8 Stomach</p>		<p>Store and break down food you eat.</p>	<p>Digestive Muscular Nervous</p>
<p>9 Small Intestine</p>		<p>Most chemical digestion and absorption of food takes place</p>	<p>Digestive Excretory Circulatory Muscular Nervous</p>
<p>10 Heart</p>		<p>Pump blood throughtout the entire body to every cell, then returns blood from body to the lungs to pick up more oxygen. Then cycle repeats.</p>	<p>Circulatory Muscular Respiratory Nervous</p>
<p>11 Left Lung</p>		<p>Filter air and pull in oxygen to your blood and release carbon dioxide and water from your blood</p>	<p>Respiratory Circulatory Muscular Nervous</p>
<p>12 Gall bladder</p>		<p>Organ that store the bile made by the liver.</p>	<p>Digestive Nervous</p>
<p>13 Esophagus</p>		<p>Tube that connects the mouth to the stomach.</p>	<p>Digestive Muscular Nervous</p>
